Andrew O. Shadoura <`bugzilla@tut.by`>

Wub: the pure-Tcl Web server and Web toolkit

Wub

- Colin McCormack
- HTTP/1.1
- Bleeding edge
- Simple architecture
- Fast, light, easy to use

Architecture

plug resources
into
mountpoints

put everything in a namespace: everything is a proc

everything is a coroutine

HTML and Tcl interleaved (hey, PHP!)

everything is
an object

better than Markdown

[<a> href http://tcl.tk/ Home]

[http://tcl.tk/ get]

[jQ form $r .login]

DB frontends

- Dub: DB view
- Metakit
- Sql/SqIQ
- Tub: form storage

Just works

- CGI
- RAM
- ReCAPTCHA
- Repo
- SCGI
- . . .

Algebraic CMS just like Wagn

- ▸ tuples

- ▸ composition

- ▸ transclusion

- ▸ type conversion

http://code.google.com/p/wub/

Have fun!
